LAVANYA AGARWAL

Aspiring Software Engineer

Jaipur, Rajasthan

+91 9928733044 | lavanya.agarwal1508@gmail.com | LinkedIn Profile

CAREER OBJECTIVE

Aspiring Computer Science graduate aiming to leverage strong fundamentals in programming, data structures, and system development to contribute effectively in a growth-oriented organization and build a successful career in the software industry.

EDUCATION

JK Lakshmipat University, Jaipur **2024-2028**
B.Tech – Computer Science
Blue Heaven Vidyalaya, Jaipur | Senior Secondary | CBSE Board **2024**
Springfield School, Jaipur | Secondary | ICSE Board **2022**

INTERNSHIP EXPERIENCE

Dynamicore Strategies Pvt. Ltd. – AI/ML Intern **May–July 2026**
Worked on AI applications involving LLMs, RAG, agent workflows, memory systems, and AI safety.
Gained hands-on exposure to FastAPI, LangChain, LangGraph, Redis, PostgreSQL/Supabase, pgvector, Pydantic, and SQLModel.
Studied semantic retrieval, short- and long-term memory, user profiling, and context management.
Researched AI safety for financial applications by comparing Llama Guard and ExpGuard on latency, accuracy, and suitability.
Practiced REST API development, GET/POST endpoints, validation, CRUD concepts, and Postman.

PROJECTS

AI-Powered Multi-Agent News Research and Analysis System **July 2026**
Built an AI-based system to collect and analyze news using FastAPI, LLMs, and RAG.
Used Groq, FAISS, LangChain, and LangGraph to create simple AI research workflows.
Worked on multi-agent research for news and financial information.

CPCT – Campus Placement & Career Tracking System **November 2025**
Designed a system for managing student profiles, company drives, eligibility criteria, and placement outcomes.

Cyber Safe Legal Compliance System **April 2025**
Designed a web-based compliance management system with secure authentication, activity logging, data-handling concepts, and structured database management.

SKILLS

Languages: C, Python, JavaScript (Basic)
Web Development: HTML, CSS, Responsive Design, React.js (Currently Learning), Full Stack Development
Core Concepts: Data Structures & Algorithms, Problem Solving
Machine Learning: Data Preprocessing, Model Training & Evaluation
Tools: Git, GitHub, VS Code

EXTRA CURRICULAR ACTIVITIES

Volunteered in Discipline Team, JKLU Sabrang 2024 (Cultural Fest) **2024**
Coordinator, Food & Accommodations Team, HackJKLU'26 (Tech Fest) **2026**

CURRENT LEARNING FOCUS

Full-stack web development with React.js, frontend development, backend integration, APIs, and databases.
Strengthening software development fundamentals through practical projects.
Continuing to explore AI application development, LLMs, RAG, and multi-agent systems.
